

Prime Tournament Example

In this scenario, there are 68 bowlers participating.

Division Entries:

Handicap: 13

SRB: 21

SRA: 34

To determine the minimum scholarship total to be awarded per division is calculated by multiplying the number of participants with \$30

Handicap: $13 * \$30 = \390

SRB: $21 * \$30 = \630

SRA: $34 * \$30 = \$1,020$

Bowlers to advance to Finals:

Handicap: 3

SRB: 4

SRA: 6

Scholarships Awarded:

Handicap (13)	SRB (21)	SRA (34)
1 st - \$195.00	1 st - \$283.50	1 st - \$367.20
2 nd - \$117.00	2 nd - \$170.10	2 nd - \$234.60
3 rd - \$78.00	3 rd - \$94.50	3 rd - \$132.60
	4 th - \$63.00	4 th - \$102.00
	5 th - 12.60	5 th - \$71.40
	6 th - \$6.30	6 th - \$51.00
		7 th - \$20.40
		8 th - \$20.40
		9 th - \$10.20
		10 th - \$10.20
Total Awarded: \$390.00	Total Awarded: \$630.00	Total Awarded: \$1020

How are ties handled?

If a tie exists at the conclusion of the qualifier round, a one-ball roll-off will be bowled on the same pair of lanes to break the tie. The bowler who had the highest final game during qualifying will determine the starting lane and order for the roll-off.

If a tie exists during single or double elimination match play, a two-frame roll-off will be bowled on the same pair of lanes to break the tie. Roll-off totals are based on scratch scores regardless of MYST division.

If there is a tie for a position that does not advance to the finals, the total award amount per position will be split evenly between those who have tied.
